The parlor and dining-room were tastefully decorated. In the latter the arrangement of goldenrod was very artistic. Manufacturers of Glass. According to the Dominion Bureau of Statistics, the manufacture of glass in Canada is a waning industry. In five years, since 1900, there has been a very large falling off in number of employees and a corresponding falling off in amount of wages. At the same time the imports of glass are increasing most remarkably. In 1902 the imports were valued at \$1,323,633, and in 1906 they were valued at \$2,673,031, an increase of \$1,349,398. The Canadian manufacturer says the trouble is the lack of protective duties.
